JOURNAL OF CELLULAR PHYSIOLOGY

NOTICE TO CONTRIBUTORS

Revised January 1990

Manuscripts and all editorial correspondence should be sent to Dr. Vittorio Defendi, New York University Medical Center, Department of Pathology, 550 First Avenue, New York, New York 10016, USA. **It is required that the letter of submission be signed by all co-authors. It is also suggested that the names of five (5) possible reviewers be submitted to decrease the processing.**

All manuscripts must be in English. Authors whose "first" language is not English should arrange for their manuscripts to be written in idiomatic English before submission. Either American or British style is acceptable. Submit the original and two clear copies of all elements (including tables and figures) typed on one side of good quality 22 × 28 cm (8½" × 11") paper with at least 25 mm (1") margins. Double space everything. Start a new page for each major division of the manuscript. Number all pages in sequence, beginning with the title page. Arrange the copy in the following order:

TITLE PAGE: This should contain:

- Complete article title
- Names and affiliations of all authors
- Institution(s) at which the work was performed with city, state, and Zip Code
- Acknowledgments of funding
- Name, address, telephone number, and cable address or Telex number for all correspondence
- A running head of not more than 48 characters
- Total number of text figures and tables

ABSTRACT: This should summarize the major findings and conclusions in the paper in not more than 250 words compressed into a single paragraph. The abstract will serve in lieu of a concluding summary and should be intelligible without reference to the rest of the paper.

TEXT: The text should follow the format: Abstract, Introduction, Materials and Methods, Results, Discussion, and Acknowledgments. Use subheadings and paragraph titles whenever possible. Define unusual abbreviations at first mention. Units of measure must be written in metric units.

LITERATURE CITED: References in the text to the literature should be made by author's name followed by year of publication:

... studies by Briggs (1975) reveal...

... studies by Briggs and Porter (1975) reveal... If there are more than two authors, use the first author and et al. The final list must be alphabetized and include only references cited in the text. Each entry must include the names of all authors, complete title of the work cited, and inclusive page numbers. Abbreviations of journal titles should follow those used in *Index Medicus*.

Examples:

Hall, D.J., O'Leary, J.J., Sand, T.T., and Rosenberg, A. (1981) Commitment and proliferation kinetics of human lymphocytes stimulated in vitro: Effects of α -MM addition and suboptimal dose on concanavalin A response. *J. Cell. Physiol.*, 108:25-34.

Zwilling, E. (1961) Limb morphogenesis. In: *Advances in Morphogenesis*. M. Abercrombie and J. Brochet, eds. Academic Press, New York, Vol. 1, pp. 301-330.

LEGENDS: Each illustration must have a legend and be numbered consecutively with arabic numerals. Abbreviations pertaining to the labeling of figures should be listed once, alphabetically, and placed before the first figure containing these abbreviations.

TABLES: Each table must be typed on a separate page, be numbered in order of appearance with arabic numerals, have a title, and be keyed into the text.

ILLUSTRATIONS: Use illustrations sparingly; they should not duplicate information already made clear in the text. Illustrations may be mounted or unmounted. Good quality glossy black-and-white photographs 5" × 7" or 8" × 10" are preferred; a charge will be made for color. All graphics and lettering must meet professional standards and be legible after reduction in size. Illustrations must be numbered in order of appearance with arabic numerals and keyed into the text. Name of author, figure number, reduction requested, and an arrow indicating the orientation should be typed on a gummed label and affixed to the back of each illustration. Do not write directly on the back of the photo. If no reduction is desired, an illustration or group of illustrations should not exceed 6¾" (approximately 17.1 cm) wide by 8¾" (approximately 22.2 cm) long. Illustrations should be enclosed in an envelope.

All manuscripts submitted to JOURNAL OF CELLULAR PHYSIOLOGY must be submitted solely to this journal, may not have been published in any part or form in another publication of any type, professional or lay, and become the property of the publisher. Any material reproduced or adapted from any other published or unpublished source must be duly acknowledged. It is the author's responsibility to obtain permission to reproduce copyrighted material. Upon acceptance of a manuscript for publication, the author will be requested to sign an agreement transferring copyright to the publisher, who reserves copyright. No published material may be reproduced or published elsewhere without the written permission of the publisher and the author. The journal will not be responsible for the loss of manuscripts at any time. All statements in, or omissions from, published manuscripts are the responsibility of the author, who will assist the editor and publisher by reviewing proofs before publication. Reprint order forms will be sent with the proofs. It is important to order, initially, a sufficient quantity of reprints since the cost is substantially higher if ordered after publication.

To help defray the costs of printing, the publisher will request from the author \$18 per page for text and tabular material and \$9 per page for illustrations, both the line drawings and photographs. Such payments are voluntary and are not a prerequisite to the publication of any article. However, because of the very high cost of color work, such work will be initiated only at the author's request and expense.
